Restriction to one of the following inventions is required under 35 U.S.C. §121:

- I. Claims 1-6, 8, 9, 11, 14, 16, drawn to compounds in which A_o is limited to a hydrogen atom.
- II. Claims 1-14 and 16, drawn to compounds in which A_o is limited to one of the acyl groups that is recited in claim 1.
- III. Claims 15 and 17, drawn to methods of using the Group I compounds.
- IV. Claims 15 and 17, drawn to methods of using the Group II compounds.

.

The claimed inventions are distinct.

Inventions I, II and III, IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP 806.05(h)). However, in the event that Group I or Group II is elected, and claims therein found allowable, the corresponding method-of-use claims will be rejoined for further examination provided that the limitations present in the claims (drawn to the composition)

are incorporated into the method claims [*In re Ochiai* (37 USPQ2d 1127)].

Applicant is advised that for the response to this requirement to be complete, an election of the invention to be examined must be indicated, even if the requirement is traversed (37 C.F.R. 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

In addition to the foregoing, applicants are required under 35 U.S.C. §121 to elect disclosed species (as follows) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

- In the even that Group I or Group II is chosen for initial examination, a “specie” would be a specific compound, with all substituent variables fully accounted for.
- In the even that Group III or IV is chosen for initial examination, the first “specie” to be elected is a specific compound, with all substituent variables fully accounted for.
The second specie would be either of the following: (a) a specific disease to be treated, or (b) a specific receptor that is to be purified.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.
